

A scenic landscape photograph serves as the background for the cover. In the foreground, three people and a dog are sitting on a rocky, reddish-brown outcrop, looking out over a lake. The middle ground shows a calm lake surrounded by dense green forests. In the background, rolling mountains are visible under a cloudy, overcast sky. The overall mood is peaceful and natural.

WORKBOOK

2019

ENGLISH

SWE **PRIMUS**[®]

A close-up photograph of a person's hands holding a wooden skewer with a variety of ingredients including salmon, zucchini, and yellow bell peppers. The skewer is being held over a silver metal grill, which is part of a Primus Openfire stove. Several other skewers with similar ingredients are visible on the grill. The background is slightly blurred, showing more of the grill and the outdoor setting.

TODAY IS A GREAT DAY

An adventure can be whatever we want it to be. For some, it's climbing the cloud-covered summit of Matterhorn or exploring the vibrant rainforests of the Amazon. Others find their adventure while escaping the city for stress-free strolls in the woods or relaxing dips in a lake.

But no matter the adventure, we all need energy to experience it. Food is our fuel for those last trembling steps up to the peak, and it is food that let us tiptoe into those cool, relaxing waters. And the better the food, the better the adventure.

And that's why we at Primus focus on cooking in the wild and engineering the best outdoor cooking equipment possible. We've been doing just that for well over a century and now we've added the final pieces of our Campfire range puzzle – the Openfire stoves. Like all our products they are designed with food in mind. Making the preparation, storing, transporting, and cooking of your meals as easy and intuitive as possible. Your adventure is waiting. Go find it.

2019 COLLECTION

AERIL LARGE

The Primus Aerial L is a multifunctional and durable accessory that allows you to cook over an open fire. Made from stainless steel, the sturdy legs and solid design are ideal for use with the included grill grate, Primus Open Fire pans and standard pots. The grill grate is height adjustable to control cooking temperature by moving it closer/further from the fire. The compact, flat-folding format makes it easy to transport in the included bag, so you're always ready to cook at the campfire.

AERIL SMALL

The Primus Aerial S has all the smart features of the Primus Pan Stand L, but in a smaller format. Made from stainless steel, the sturdy legs and solid design are ideal for use with the included grill grate or standard pots and pans. The compact, flat-folding format makes it easy to transport in the included bag or standard backpack, so you're always ready to cook at the campfire.

AERIL LAUNCH CAMPAIGN

Get 6 skewers for free with your Aerial Large!

- For end-consumers.
- Only as a Pre-Order until 31.12.2018.
- For delivery in April & May
- Skewers will be packed together with the Aerial Large.
- Special article nr: 740051

+

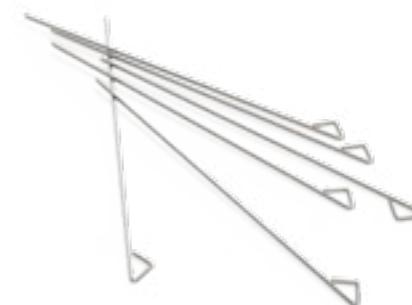

IGNITION STEEL

The Primus Ignition steel is the optimal way of starting a fire or lighting your stove in all weather conditions. It's water resistant and works in wet conditions – even rain and snow. The steel parts are well-protected in the integrated case, which also features a lanyard for easy carrying. The spark emitted has a temperature of 3000 °C and will strike thousands of times, making it an essential camping companion for many years to come.

SKEWERS

These skewers are great for easy cooking over open fire or use in the Kuchoma Grill. The flat shape and the sharp tip ensures that it is easy to stick whatever food on the skewer, and it will stay on and turn when you are ready to turn it.

CAMPFIRE CHOPSTICKS

The CampFire Chopsticks are made of rosewood and brass. They consist of two detachable parts to make packing and storing easier. Simply screw them together when it's dinner time. The coupling in threaded brass makes them sturdy when in use. Includes a fabric cover.

TARP

Heavy duty and versatile protection from rain, wind and sun. The OpenFire Tarp is made of a cotton polyester blend with a PFOS and PFOA-free DWR treatment. The OpenFire Tarp L has ten attachment points for guy-lines and OpenFire Tarp S has eight attachment points. The buckle that attach the guy-lines makes it easy to move them around and detach if not needed.

TODAY WE MAKE OUR ESCAPE

We take the afternoon off. Work can wait. Today is about friendship and answering the call of the wild. We pack what's necessary and leave within the hour.

A car ride, a trek, and we're here. Far away from the noise and obligations of the city, in the heart of the untamed where we are free.

We spend our time with majestic mountains, boundless forests and sky-blue lakes. A landscape that gives us the freedom to do whatever, but devoting the day to just being together is the easy choice. We eat, we

reconnect, and we seize and savour every moment. We sit by the fire. Share stories and revisit memories. This is just the place and time for long discussions and conversations only interrupted by our fits of laughter. The flames create a sanctuary where we speak about nothing and everything.

At times we're just silent. Under the clear skies we listen to nature's own symphony. It's still. It's wild.

Today is a great day. Get out. Cook out.

CAMPFIRE

Our Campfire range is especially designed with adventures of a smaller nature in mind. From woodland forage to beachside BBQ, these are stoves that bring culinary delight to the great outdoors.

- Light enough to carry in one-hand.
- Compact enough to fit in a kayak.
- Space enough to feed family and friends.

TREKKING

Engineered for those adventurers with a bit more of an ambitious step in their foot. Our fuel efficient Trekking range ensures fresh-brewed coffee and good, hot meals however long your road is.

- Low in consumption, high in efficiency.
- Small and light in your backpack.
- Safe, clean, soot-free fuelled meals for weary feet.

FREEDOM TO EXPLORE WHATEVER YOUR ADVENTURE

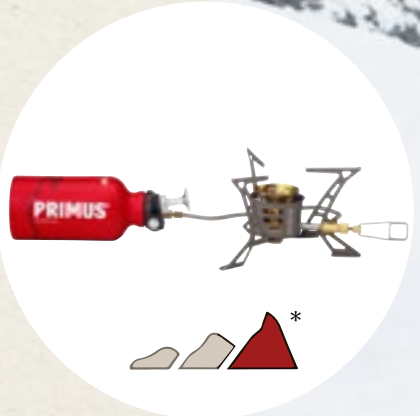

Because, big or small, food is the fuel of every great adventure we've engineered stoves to suit all needs.

** This symbol helps you decide which stove is right for your adventure.*

EXPEDITION

Designed for serious adventures across extreme conditions our Expedition range takes pride in reliability. Quality without compromise these are easy to run, easy to maintain stoves that ensure hot and adventure sustaining food is always close at hand.

- Easy to use, easy to maintain.
- Suitable for extremes (hot + cold).
- Hard to break.
- Built for gas and liquid fuels.
- Adventure sustaining food without fail.

MORE THAN 125 YEARS OF SUCCESS

From Stockholm 1892, via North and South Poles, across deserts, Mt. Everest, the Himalayas and K2. Through continuous innovations, award-winning firsts and environmental consciousness to TODAY, where the Freedom to explore continues.

1892
The partners F.W. Lindqvist and J.V. Svenson produce the first soot-free kerosene stove and call it 'Primus'.

1897
The Andrée expedition packs a Primus stove and attempts to reach the North Pole.

LATE 19TH CENTURY
Primus gets a logo.

1908
The Lilla Essingen Primus factory opens.

1911
Roald Amundsen takes a Primus stove and heads South to the Pole.

1930^S
Primus stoves are readied for adventure.

1930^S-1950^S
Primus develops LPG stoves, LPG lanterns and LPG cylinders.

1950
Primus production begins in Hagfors.

1953
Sir Edmund Hillary and Tenzing Norgay become the first to reach the summit of Mount Everest. They prepare their food on a Primus stove.

1960
The Primus logo gets its oval shape.

1978
Primus start its environmental work by developing gas burners for African countries to reduce the amount of wood used for cooking.

1995
A new Primus factory in Tartu, Estonia, is opened.

1996
Primus welcomes MultiFuel - the first stove that can run on LP gas, whitegas, kerosene and even aviation fuel. It's tested by Göran Kropp on Mount Everest.

2006
Primus launches PrimeTech - stoves with efficiency rates that are double compared to conventional stoves.

2011
Primus launches the award-winning multifuel stove OmniLite Ti.

2013
Thanks to a new patented burning technology, Primus launch Lite, our smallest complete stove system ever.

2014-2016
The first new Primus logo in 50 years is launched alongside wintergas, and followed-up by the CampFire range.

2017
Award-winning Primus Primetech stove sets arrive as the first regulated hose stove sets for all round year use.

PRODUCTION AND QUALITY CONTROL THE PRIMUS STOVE: INVENTED IN SWEDEN, MADE IN EUROPE

Designing greatness. We know that you demand products of the highest quality. Equipment you can rely on even during extreme conditions; essentials that will last you a lifetime of adventures. That's why we keep reinvesting into our in-house research and development. And that's how we are able to keep pushing the standards for outdoor cooking, year after year.

Everything starts in the test lab of Primus' headquarter in Solna, Stockholm. At our R&D team's playground you'll find tons of instruments, tools and various simulators to help our engineers construct and test new prototypes in all kinds of conditions. Every design has to undergo the same rigorous testing, resulting in as many number of laps back to the drawing board as it takes to perfect the design. And that's before any prototype ever sees live testing in the fields.

MANUFACTURING DURABILITY

Back in 1995 we moved stove production to our neighbor country across the Baltic Sea: Estonia. The short distance from Stockholm, ease of quality control and

a historical tradition of craftsmanship, were all major factors in our decision. Today our factory in Tartu employs 22 skilled workers. Every single stove passes through three pairs of hands before final assembly is done. And our expedition and trekking stoves, as well as our gas lanterns, also have to withstand a final test before they leave the factory: we check them for leaks and light them up to ensure they burn with an optimal flame. This means there may appear a few tarnishes around the burner of your new Primus stove. These marks are our assurance to the user that their new stove is in perfect working order, ready for years of reliable, safe service.

PRIMUS EXPEDITION SERVICE: STOVES MADE FOR LIFE

For over 120 years our products have been tested and trusted in the harshest of environments. We take great pride in ensuring all our products meet superior quality and that they will, with the proper maintenance, provide years and years of service. That's why we are introducing Primus Expedition Service, applicable to any expedition stove (OmniLite TI, OmniFuel and MultiFuel) sold from 2015 onwards. In the unlikely event the stove should fail due to defective materials or construction, we will help the original owner by sending spare parts, repair the stove or replace it – free of charge.

See www.primus.eu/expeditionservice for a more extensive description and terms and conditions.

THE SECRET BEHIND PRIMUS FUEL EFFICIENCY TECHNOLOGY

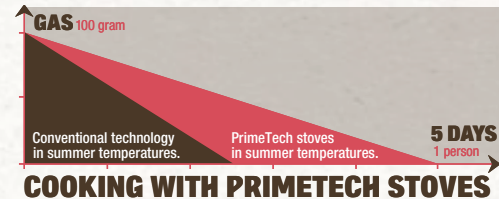

40 percent, that's the efficiency rate for a conventional stove. Literally that means that more than half of your energy disappears into nothing.

– All of us who spend time in the great outdoors have one thing in common: we want hot meals as quickly and smoothly as possible, says Eric Svartström, Head of R&D at Primus.

Primus fuel efficient PrimeTech stoves gives an efficiency rate that's nearly doubled compared to a conventional stove. So choosing a PrimeTech stove means:

1. You can bring less fuel with you.
2. Less fuel is good for your purse, your back and the environment.
3. Your food will heat up/boil faster.

PRIMUS FUEL EFFICIENCY TECHNOLOGY

Lite+ has an efficiency rate nearly double of a conventional stove so you can bring less fuel or stay out longer.
100 grams LP gas lasts for roughly one hour continuous cooking, depending on altitude, weather conditions and temperatures of the water used. That translates to the cooking of every lunch and dinner, as well as the brewing of breakfast and afternoon coffee or tea, for one person during a five day adventure - twice the efficiency you'll get for a conventional stove!

FIND YOUR FAVORITE AND YOU'LL HAVE A FRIEND FOR LIFE

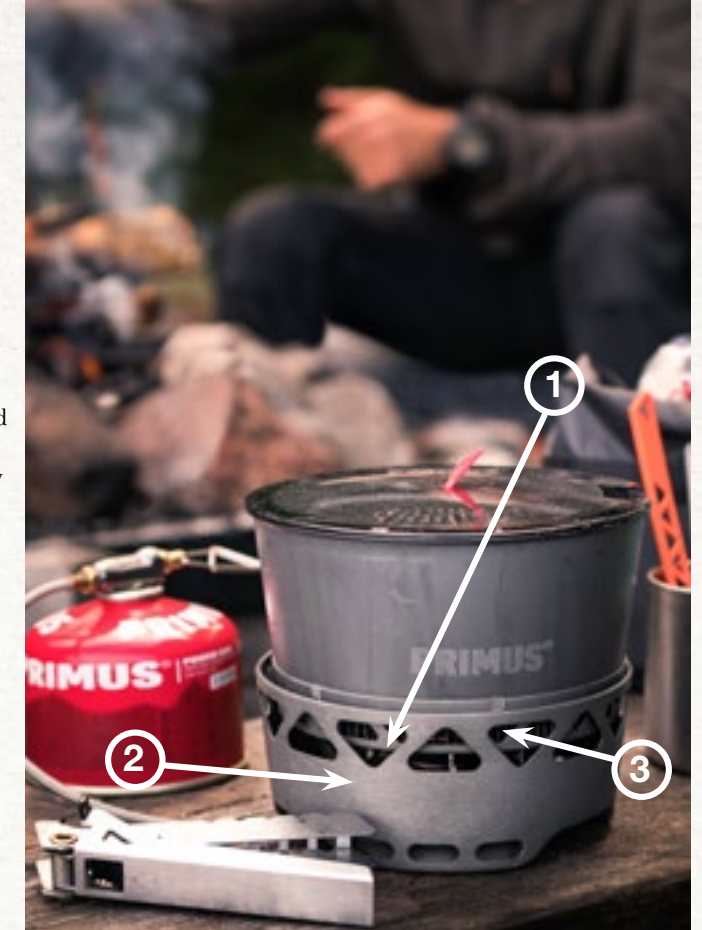

Eric Svartström again:

– During the development of the super efficient stoves, we went back to the drawing board and reviewed every aspect of the stove: How do we make the burner, the windshield and the pot work optimally together? How do we get your LP gas to last almost twice as long, by reducing heat loss and heat-up time?

Primus solved the challenges. Every PrimeTech stove now offers you an unsurpassed user experience for a long time onwards, at a maximized efficiency rate and at a minimal environmental impact.

Have a nice, long trip!

– Eric Svartström, Head of R&D

THREE INNOVATIONS IN ONE

The secret that enables a PrimeTech stove to achieve an efficiency rate close to 80 percent, is a combination of:

1. The burner is optimized for the new generation fuel-efficient pots with heat exchangers.
2. The windshield that protects the flame.
3. The pot has a built-in heat exchanger that absorbs the heat better than a conventional pot.

The yellow/red parts show areas where heat goes up past the sides of the pot rather than going in to the pot.

Significantly less heatloss with this technology.

MOTHER NATURE WILL ALWAYS SURVIVE

Mother nature will always survive in one way or another, but if our generation continues to drain the nature, coming generations will surely have trouble to enjoy it as we are able to do.

Our existence as an outdoor brand – and as individuals who constantly thirst for new outdoor experiences – is closely linked to our environmental awareness.

– We seek to make more efficient use of resources in everything we do, to find more environmentally friendly alternatives and to make our company as close to one hundred percent climate neutral as possible. If we don't, we won't have any adventures to go out to, says Lars-Ola Brolinson, CEO at Primus.

PRIMUS LOGO – A RELIABLE FRIEND

When you see the Primus logo on a product, you can take this as a guarantee that it has been made to be a reliable friend that will stand regular use for many, many years.

– It's about reducing our need for raw materials, the energy we use in production, how we transport our products and the way we package them. And last but not least, to boost efficiency in order to decrease fuel consumption, says Lars-Ola Brolinson.

Primus PrimeTech stoves with fuel efficiency technology have an efficiency rate of 80 percent, which means they are almost twice as fuel efficient as conventional outdoor stoves. This not only reduces the amount of CO₂ emissions from the stove but also emissions related to the production and transport of the fuel.

REPLACEABLE AND RECYCLABLE PARTS

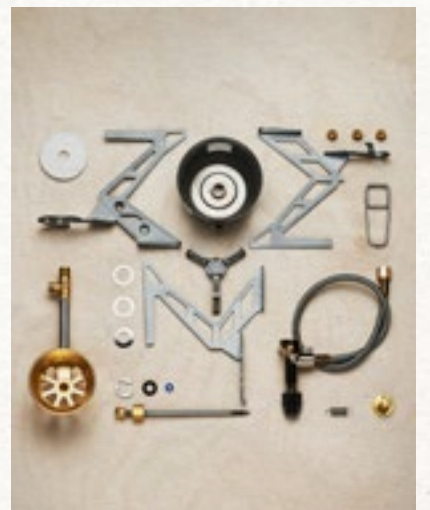

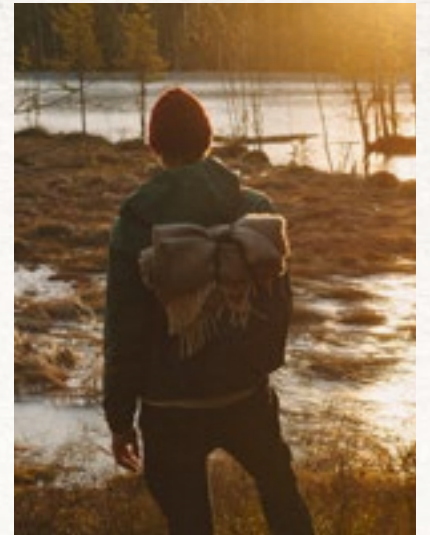

The majority of Primus products have replaceable parts and Primus continue to stock spare parts for old products, you can always replace worn components and further extend the life of your stove. If, against all odds, your Primus product were to be damaged beyond repair, its component parts can be recycled to produce new products.

FSC CERTIFIED AND RECYCLED

About half of our packaging is FSC certified. That means that the whole manufacturing process and the material is fully traceable and done according to strict standards. The remaining half of the packaging is made from recycled paper.

A CARBON DIOXIDE NEUTRAL FUEL

Primus gas is a carbon dioxide neutral fuel. To compensate for the carbon dioxide emissions from the gas and the metal cartridge, we support a project that helps households in Uganda, one of the poorest countries in the world, to go greener. By subsidizing and making fuel-efficient stoves accessible for everyone, inefficient firewood or charcoal stoves are replaced and the emission of greenhouse gas is reduced by 1.5 ton of CO₂ per stove per year. The high rate of deforestation is lowered, which can prevent draughts and floods. Families benefit from cleaner indoor air and lower energy costs. Less time for collection firewood is needed, which allows girls to go to school and women to pursue income-generating activities.

Winner

Light and compact
for easy traveling.

Horizontal burner tube
provides even cooking.

Non-stick grill grate for
mess-free cooking and
easy clean up.

The steel legs raise the
grill from the surface
and provide support
and stability.

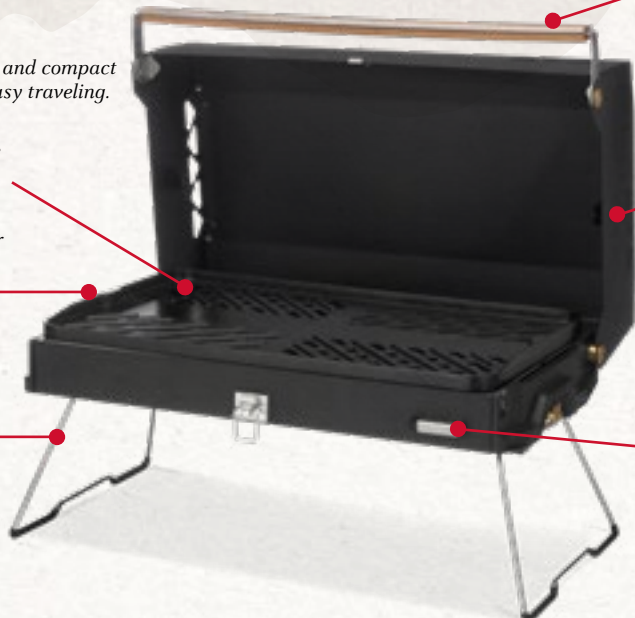

Wood trimmed metal handle
for safe opening/closing and
durable transport.

Hood seals in the heat and the
flavor when closed.

Powered by gas cartridges
or propane*. US version
comes ready to connect to
standard propane.

Piezo Ignition.

Sold separately: 741120
»Hose with adapter« to run on
tanks and cylinders with P.O.L
connections.

Designed to nest - no
rattling around in
transport.

Insulated storage bag
holds all parts and can
be used to keep food
warm when placed
around the pot.

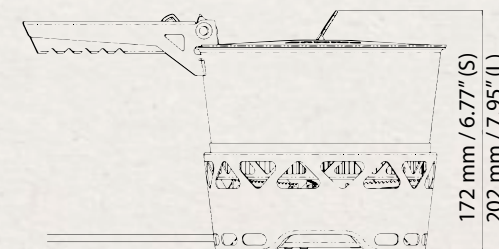

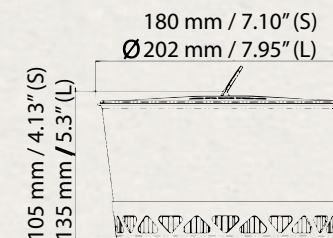

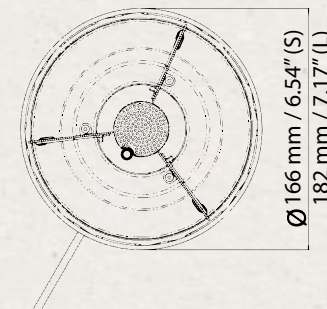

PRIMETECH STOVE SET

PERFORMANCE FIRST

Stove sets provide a simple, easy way to enjoy a hot meal outside. They are small, lightweight and all components pack down into an insulated bag. The PrimeTech Stove Set checks all the boxes with an impressive list of features. The most impressive is the pot with integrated heat exchanger and windscreen, which ultimately cuts fuel consumption in half compared to a conventional stove. A regulated valve provides consistent power output and improves performance when the gas cartridge is low on fuel or cold. For added safety the patented burner also features a design that prevents accidental flare-ups in the event should the cartridge fall over.

Spare parts:

MICRON TRAIL STOVE

STURDY AND LIGHTWEIGHT

The MicronTrail Stove is one of our most advanced stoves with low weight and compact format. A narrow, high speed flame is more wind resistant and especially suitable for Primus Primetech pots. Choose between simplistic MicronTrail without piezo igniter to reduce weight, with a piezo ignition for extra convenience and with regulated valve and piezo ignition for maximum performance.

Simple and affordable backpacking stove.

Nylon bag included.

Piezo ignitor option.

Crosswise pot support acts as a built-in windscreen that makes cooking both fast and reliable.

DUO VALVE

MIMER/CLASSIC TRAIL

SIMPLE, STURDY AND FLEXIBLE

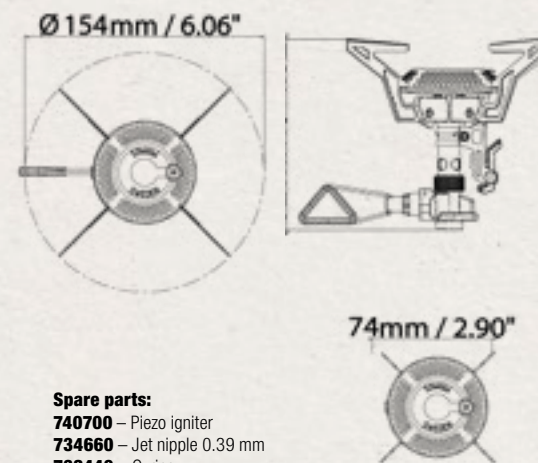

ClassicTrail is a simple, durable and classic outdoor stove for those who wish to enjoy good food in the great outdoors. A robust design and a great value. The crosswise pot support acts as a built-in windscreen that makes cooking both fast and reliable. Reduce weight with the simplistic Classic Trail without piezo igniter or choose the one with a piezo ignition for extra convenience. Comes with a nylon bag.

Four foldable pan supports for stability.

Features both a Piezo igniter and a valve with a regulator.

324417

POWER TRAIL STOVE

FOLDABLE POWER PACKAGE

The PowerTrail stove is our most powerful gas stove and is great if you are cooking for a lot of people. Thanks to the powerful burner and the wide flame combined with four stable pan supports, this stove works very well with large pots and pans. It can also be equipped with a Duo valve to fit most gas containers available. Additionally you can choose one with or without regulator.

Four stable, foldable legs
and a wide flame make it
suitable for larger pots.

Comes with a windscreen, a
heat reflector, an igniter and a
nylon storage bag.

Preheating
coil makes
cooking
in lower
temperatures
easier.

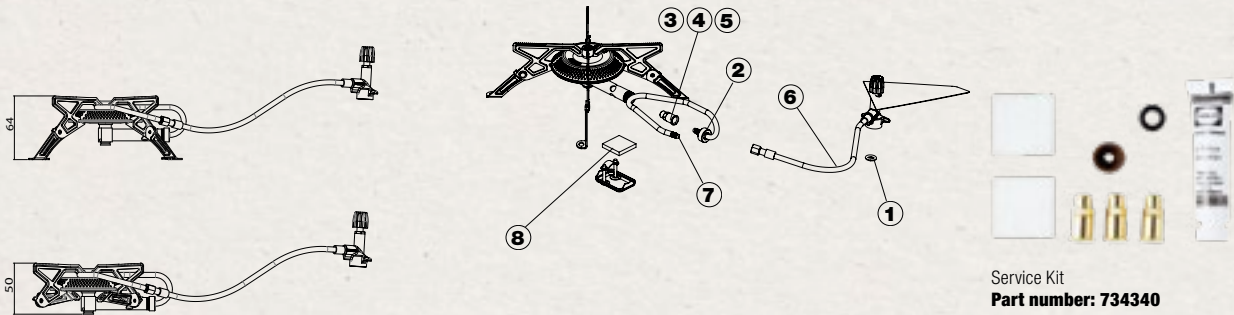

ACCESSORY

GRAVITY MULTIFUEL KIT

There is an upgrade for people who already have the gas version of the 328196 Gravity III™, but would also like the option of using liquid fuel, including naphtha fuel and lead-free petrol, and even kerosene in emergencies. The kit has a 0.6-litre fuel bottle, ErgoPump, a multi-tool with a cleaning needle, fuel cup and jet nipples. A practical storage bag is included.

328485 Express Spider™			

EASY FUEL WARM FOOD – ANYWHERE

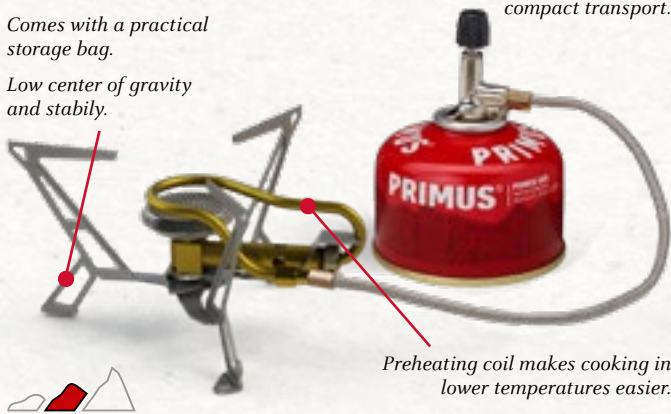

Easy Fuel is all that the name implies - a gas stove that is very easy to use thanks to its sturdy and reliable design, and the fact that it is equipped with a piezo igniter. The version with a Duo valve fits most gas cartridges with a valve on the market. The perfect stove for the global traveler. The Easy Fuel is also available with the standard threaded connection. Comes with a nylon stuff sack.

Can be updated to run
on liquid fuel.

Comes with a practical
storage bag.

Low center of gravity
and stability.

Pot supports lock securely in
the unfolded position for a
compact transport.

EXPRESS SPIDER THE LIGHTWEIGHT ALTERNATIVE TO TOP MOUNTED STOVES

The ExpressSpider is one of the lightest hose-mounted gas stoves available and a perfect alternative to any top-mounted gas stove. An obvious choice for those who are after a hardwearing and flexible stove.The stove is delivered with a heat reflector and nylon stuff sack. With the optional Multifuel Kit (737500), Epress Spider can be converted to run on liquid fuel such as white gas.

“The world’s smallest multi-fuel stove: it can burn gas as well as all kinds of liquid fuels from gasoline to diesel. What an ingenious invention!”

OutDoor Industry Gold Award 2011

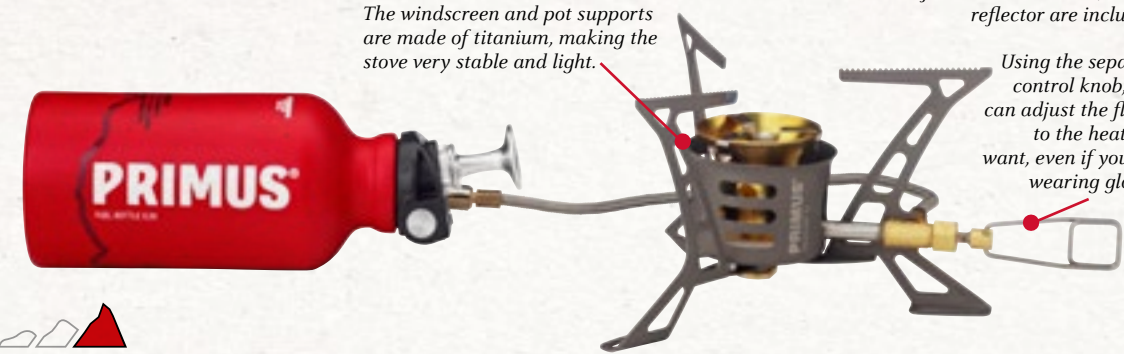

Smaller, lighter and much more fuel-efficient than most stoves in the expedition category.

OmniLite Ti works with gas, gasoline/petrol, diesel, kerosene/paraffin, and even aviation fuel.

ErgoPump™, a multi-tool with a cleaning needle, a foldable windscreen, a heat reflector are included.

The windscreen and pot supports are made of titanium, making the stove very stable and light.

Using the separate control knob, you can adjust the flame to the heat you want, even if you are wearing gloves.

OMNILITE TI

OUR MOST ADVANCED STOVE EVER

OmniLite Ti is based on the same technology as our award-winning OmniFuel and is constructed to handle demanding situations and environments. This stove is just as reliable and robust, but smaller, lighter and much more fuel-efficient. Its output has been adapted for the new generation of fuel-efficient pots with a heat exchanger, like our Eta Pots™. The windscreen and pot supports are made of titanium, making the stove very stable and light. OmniLite Ti works with gas, gasoline/petrol, diesel, kerosene/paraffin, and even aviation fuel. Using the separate control knob, you can adjust the flame to the heat you want, even if you are wearing gloves. The pack size is minimal and the stove is perfect for one or two eco-conscious people heading out on an adventure. ErgoPump™, a multi-tool with a cleaning needle, a foldable windscreen and a heat reflector are included.

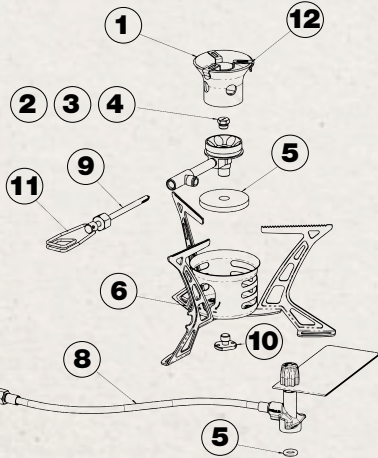

ACCESSORY

OmniLite Ti™ Silencer – 737937
Attach this small accessory and listen to the undisturbed sounds of the wilderness – even while cooking! When using LP-gas or white gas OmniLite Ti can be fitted with this silencer that transforms it into a silent stove. The silencer is not suitable when burning diesel, kerosene/paraffin or aviation-fuel.

321987 OmniLite™ Ti – incl. US fuel bottle (US)				

Extremely robust, reliable and powerful. Designed to handle demanding situations, extreme altitudes and both low and high temperatures.

Very high output and can be used with virtually any kind of fuel, including Primus PowerGas cartridges, gas, gasoline/petrol, diesel, kerosene/paraffin, and even aviation fuel.

Fuel bottle, ErgoPump™, a multi-tool with cleaning needle, windscreen, heat reflector included.

Control knob allows you to adjust the flame to the heat you want, even if you are wearing gloves.

OMNIFUEL

THE COMPANION PROVEN OVER YEARS

Our most award-winning stove ever. The Omnifuel has been tested extensively over many years and has been used on countless expeditions. It is extremely robust, reliable and powerful and was designed to handle demanding situations, extreme altitudes and both low and high temperatures. OmniFuel has a very high output and can be used with virtually any kind of fuel, including Primus PowerGas cartridges, gas, gasoline/petrol, diesel, kerosene/paraffin, and even aviation fuel. Using the separate control knob, you can adjust the flame to the heat you want, even if you are wearing gloves. OmniFuel II comes with a fuel bottle, ErgoPump™, a multi-tool with a cleaning needle, a windscreen and a heat reflector.

MultiFuel produces a powerful flame that works very well even under extreme weather conditions.

Sturdy stove that works with gas, gasoline/petrol, diesel, kerosene and even aviation fuel.

MultiFuel III comes with an ErgoPump™, a multi-tool, a nylon bag, a windscreen and a heat reflector.

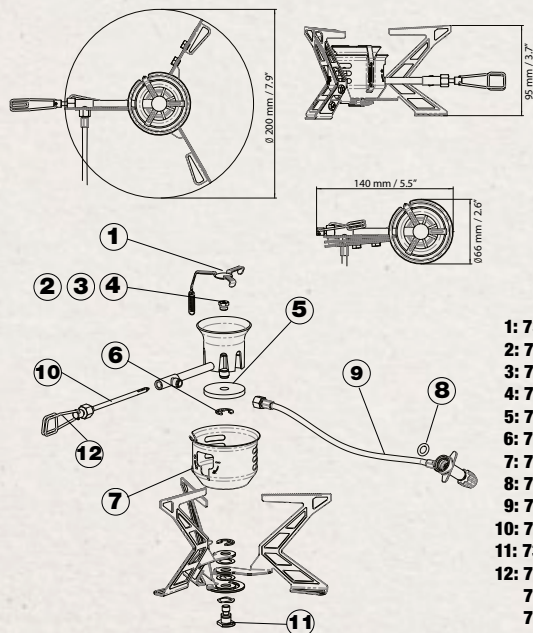

Pot supports lock securely in the unfolded position and folds tighter, making the stove more compact when stuffed away.

MULTIFUEL

THE TRUE WORKHORSE REFINED

MultiFuel is a sturdy stove that works with gas, gasoline/petrol, diesel, kerosene and even aviation fuel. It produces a powerful flame that works very well even under extreme weather conditions. The new pot supports (grids) locks securely in the unfolded position and folds tighter, making the stove more compact when stuffed away. The jets are clearly marked for each fuel type and attached to the pot supports (grids) so that they are never lost. MultiFuel III comes with an ErgoPump™, a multi-tool, a nylon bag, a windscreen and a heat reflector.

DUO Ventil

EASY LIGHT

LIGHT AND WARMTH – ANYWHERE

The Easy Light spreads light and warmth and takes up no more space than a medium-sized orange in your backpack. The lantern is equipped with a piezo igniter and a patented, almost noiseless burner and has a continuously adjustable brightness corresponding to a maximum of 490 lumens. The version with a Duo valve fits most gas cartridges with a valve on the market. The perfect lantern for the global traveler. The EasyLight is also available with the standard threaded connection, made of corrosion and maintenance-free materials and comes in a durable plastic box.

- Silent
- Easy ignition
- Available with Duo valve

Pat. EU 484944-0001

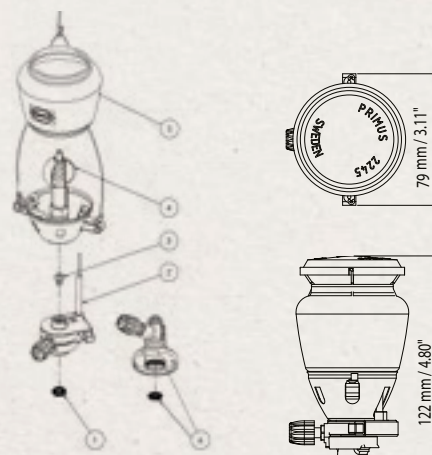

MICRON LANTERN

A BRIGHTER FUTURE

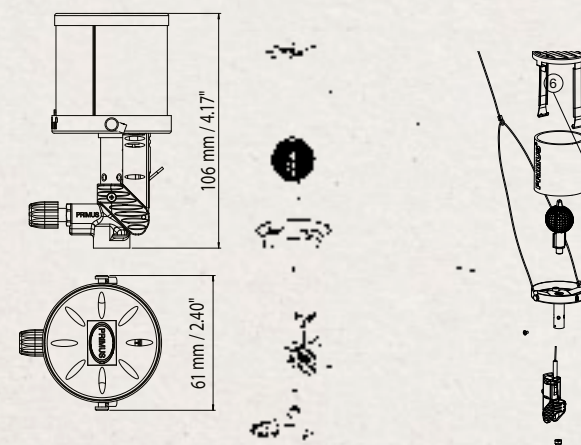

The Micron Lantern is a compact, lightweight and durable lantern that provides light and warmth when you need small dimensions, low weight and durability. It's available in two versions: with a stainless steel mesh or in frosted glass. The stainless steel mesh is more durable, of course, whereas the glass version provides a more powerful light. Brightness is infinitely adjustable, up to 235 lumens on the steel mesh version and 360 lumens on the glass version. Two of the lantern's most important features are patented. The EasyTrigger™ ignition system which allows for quick and easy lighting and the burner which ensures that the lantern is virtually silent and uses little gas. The steel mesh lantern is supplied with a nylon stuff sack, and the glass version comes in a sturdy plastic case.

FIRESTARTER
LIGHT YOUR FIRE
The easiest way to start a fire is with great heat and great power. This also has the advantage of giving good combustion from the very start and avoiding the use of chemical fire starters, which makes this method more environmental friendly than most other lighting methods. Easy to use thanks to its built in piezo-igniter and in extreme conditions, it can even be turned upside-down and using gas in its liquid form, which makes it possible to run in cold weather. This FireStarter fits all Primus PowerGas cartridges which gives the best output in all conditions.

	156 g • 5.5 oz		160 x 40 x 60 mm • 6.3" x 1.6" x 2.4"
	2100 W • 7500 BTU/h		Piezoelectric
310020 FireStarter™			

POWERLIGHTER
Primus PowerLighter with a narrow flame makes it simple to light your stove or camp fire. A temperature of 1300°C facilitates lighting liquid fuels in bad weather.

AERIL LARGE

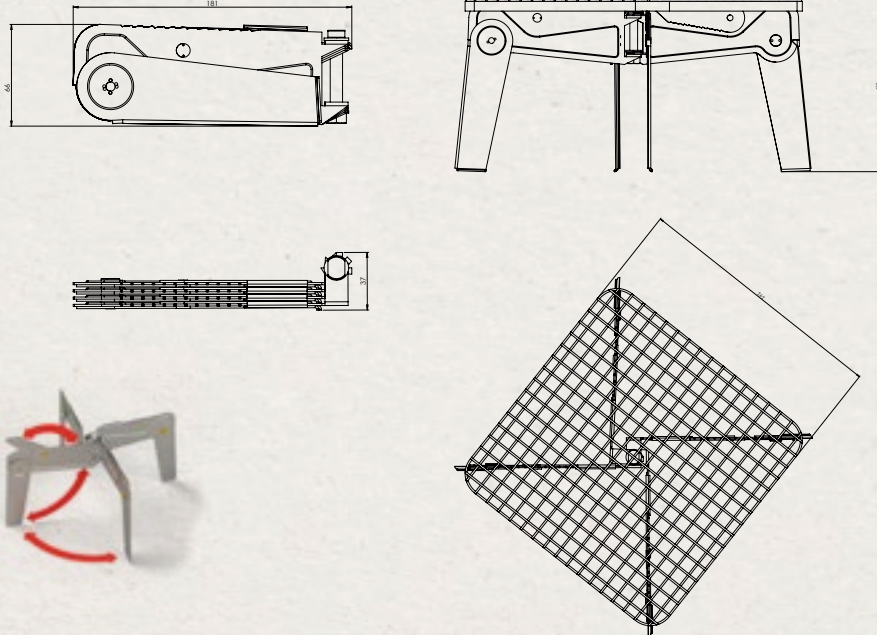

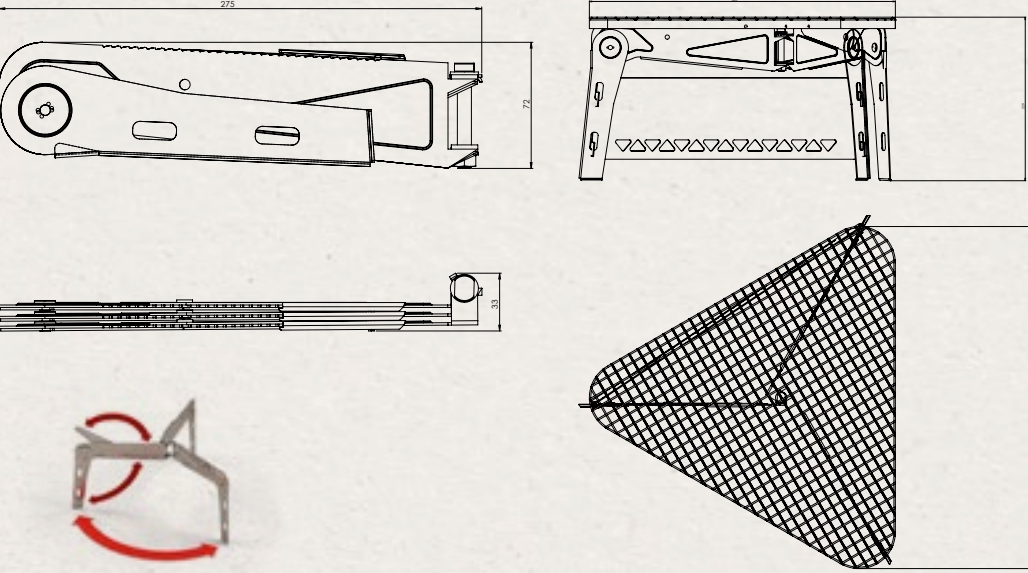

The Primus Aeril L is a multifunctional and durable accessory that allows you to cook over an open fire. Made from stainless steel, the sturdy legs and solid design are ideal for use with the included grill grate, Primus Open Fire pans and standard pots. The grill grate is height adjustable to control cooking temperate by moving it closer/further from the fire. The compact, flat-folding format makes it easy to transport in the included bag, so you're always ready to cook at the campfire.

Article number: 741350
Dimensions: 480 x 430 x 230 mm • 18.9" x 16.9" x 9.1"
Weight: 2400 g • 84.7 oz

AERIL SMALL

The Primus Aeril S has all the smart features of the Primus Aeril L, but in a smaller format. Made from stainless steel, the sturdy legs and solid design are ideal for use with the included grill grate or standard pots and pans. The compact, flat-folding format makes it easy to transport in the included bag or standard backpack, so you're always ready to cook at the campfire.

Article number: 741340
Dimensions: 262 x 262 x 179 mm • 10.3" x 10.3" x 7.0"
Weight: 1200 g • 42.3 oz

KAMOTO OPEN FIRE PIT

Nothing beats the feeling of a campfire - the flickering flames, the sound of wood crackling. However, in many places an open fire is impossible as it would damage the ground. Kamoto is a portable fire pit for no trace campfires. Use it with wood or charcoal.

The frame is made from powder-coated steel and can be folded and transported easily. Quickly unfolded it is ready to fire up in a few seconds. Kamoto features a stainless steel fire pit with windshield sides and an air inlet from underneath which gives effective combustion. The ashtray protects the ground.

Kamoto is available in two sizes and comes including a grill grate. It is also the perfect heat source for Primus new OpenFire Pans. The larger version accommodates US standard 16" logs.

Article number:
738060 – Kamoto
Dimensions: 390 x 60 x 530 mm • 15.3" x 2.4" x 20.9"
Weight: 6100 g • 215.2 oz
738061 – Kamoto Large
Dimensions: 470 x 60 x 650 mm • 18.5" x 2.4" x 25.6"
Weight: 7000 g • 246.9 oz

OPEN FIRE PAN

Cooking over an open fire is more than just preparing a hot meal. It´s the experience of dancing flames, this specific tasteful smell of fire and the warmth. The pans have a unique three-layer sandwich material consisting of an aluminium core with stainless steel surface on the top and bottom of the pan. Aluminium has unsurpassed thermal conductivity and cuts weight compared to steel. Stainless steel on the other hand is easy to clean and scratch- and corrosion-resistant. The combination cuts weight with 35 % compared to steel and offers a much better heat distribution than conventional steel pans.

The shape of the pan features a slight depression in the center. The edges are slightly rounded making it easier to flip over pancakes, meat etc. On the sides, two handles allow positioning of the pan on the right spot over the fire. The stainless steel legs are screwed into special lugs that won't clog with fat or soot. The legs themselves have a special thread, which will prevent damages. The rectangular crosscut of the legs gives better grip for mounting and dismounting the legs.

Available in two sizes, 46x59 cm (18.1"x 23.2") and 47x76 cm (18.5"x 29.9").

Article number:
738050 – Open Fire Pan Small
Dimensions: 460 x 590 x 250 mm • 18.1" x 23.2" x 9.8"
Weight: 3400 g • 119.9 oz
738051 – Open Fire Pan Large
Dimensions: 470 x 760 x 250 mm • 18.5" x 29.9" x 9.8"
Weight: 4400 g • 155.2 oz

IGNITION STEEL

The Primus Ignition steel is the optimal way of starting a fire or lighting your stove in all weather conditions. It's water resistant and works in wet conditions – even rain and snow. The steel parts are well-protected in the integrated case, which also features a lanyard for easy carrying. The spark emitted has a temperature of 3000 °C and will strike thousands of times, making it an essential camping companion for many years to come.

OPEN FIRE PACK SACK

The OpenFire Sack with its coated inside is a convenient accessory for carrying and storing the OpenFire Pans and the Kamoto Fire Pit. Use it to carry your dirty fire pit or pan home without ruining your clothes or car. Back home you simply turn it inside out and rinse it off. Made of durable nylon with a PU-coated inside.

Article no: 738062
Dimensions: 490 x 70 x 770 mm • 19.3" x 2.8" x 30.3"
Weight: 570 g • 20.1 oz

OPEN FIRE SPATULA

Generously sized spatula for outdoor cooking. A flexible stainless steel blade and an oak handle ensure usability and durability. Perfect for the Open Fire pans and Kamoto fire pit.

Article number: 738052
Dimensions: 400 x 55 x 40 mm • 15.7" x 2.2" x 1.6"
Weight: 140 g • 4.9 oz

CAMPFIRE TONGS

Stainless steel tongs with a cut out pattern for a great grip and optimal control at the grill. The 275 mm length is compact enough for bringing them with you wherever you want your barbecue. Still it's long enough to keep your hands out of the heat. Jagged and narrow endings give a good grip and control.

Article number: 741090
Dimensions: 275 x 26x 83 mm • 10.8" x 1" x 3.3"
Weight: 133 g • 4.7 oz

CAMPFIRE APRON

Protect your clothes from grease and soot while showing off for your friends in style. Two larger front pockets and one smaller breast pocket will fit all the essentials you need while cooking. Made from durable G1000-fabric. Adjustable belt made of webbing keeps the apron in place. The buckle has an integrated bottle opener in stainless steel.

Article number: 740960
Dimensions: 800 x 630 mm • 31.5" x 24.8"
Weight: 140 g • 4.9 oz

CAMPFIRE COOKSET - LARGE

Durable 18/8 stainless steel Primus cookset - a genuine workhorse designed to withstand years and years of service. The set consists of two pots (1.8 and 3.0 L), two lids with integrated colanders and a frying pan with an integral handle. The large pot (3.0 litres) has a foldaway handle and can be suspended over an open fire. Also the frying pan has a foldaway handle and aluminium-clad bottom for an even heat distribution. Both the stackable pots and the frying pan packs compactly into an included storage bag.

Article number: 738001

740300 - Essential Pot Set 2.3L

Volume: 2.3 l • 77.7 oz
Dimensions: Ø 221 (base) x 107 mm • 8.7" x 4.2"
Weight: 662 g • 23.4 oz

PRIMETECH™ POT SET

The PrimeTech pots are designed with efficiency in mind, making the best out of every ounce of fuel used. Thanks to an integrated heat exchanger in the bottom of the pot cuts fuel consumption in half compared to conventional pots. That means your water will boil faster and your fuel will last longer. The PrimeTech pot is made from durable hard anodized aluminium and features a ceramic non-stick coating on the inside making cooking and cleaning easy. The lid, made from transparent Tritan® has an integrated colander, perfect when draining pasta water. The second pot in this kit is made of hard anodized aluminium and doesn't have heat exchanger. Besides the ordinary duties it doubles both as a frying pan and a serving bowl. It also protects the ceramic coating of the PrimeTech pot when packed together.

The PrimeTech Pot Set consists of:

- One PrimeTech pot with heat exchanger
- One hard anodized pot
- A self locking pot gripper
- A storage bag

Article number:

740380 - PrimeTech Pot Set 1.3L

TRAILBREAK EX VACUUM BOTTLE

Rugged expedition bottle. TrailBreak EX vacuum insulated bottles are made from high grade stainless steel making them rugged and durable. A silicone sleeve improves the grip and prevents cold fingers or possibly frostbite in case of handling the steel in very cold conditions. It also offers extra protection to the bottle. The cup is made from double walled stainless steel to keep the beverage hot or cold and also serves as extra protection of the stopper. TrailBreak EX is delivered with two stoppers. One regular stopper for maximum temperature retention and one ClickClose-stopper. The ClickClose-stopper also doubles as a drinking stopper, making it possible to drink directly from the bottle. It can be disassembled entirely making the stopper easy to clean. The wide mouth makes filling and also cleaning of the bottle easier.

TrailBreak is available in two sizes: 0.75 L and 1.0 L, and three colors: Coal, Tangerine and Moss.

TRAILBREAK LUNCH JUG

TrailBreak Lunch Jugs have double walled vacuum insulated construction in stainless steel making them rugged and durable. The powder coating on the outside – available in four colors – provides a grippy surface. May it be for the kids in the kindergarten, a quick lunch in the office or a hot stew when ski touring – a hot meal is better food than just a cold snack, especially in the winter when it's important to keep warm. The wide mouth opening makes it easy to fill, to eat from and to clean after use.

A benefit with Stainless steel is that it doesn't retain or impart flavors.

Available in two sizes: 400 ml (13.5 oz) and 550 ml (18.6 oz) and four colours: Black, Yellow, Red and Blue.

BIFROST H4 & H6

Primus Bifrost H4 and H6 are roomy tents with sleeping space for 4-6 people and with a standing height to fit most people. The space creates a great feeling of having a living room between the two sleeping compartments. Ventilation openings and mosquito netting keep the moisture and mosquitoes away. Aluminium arch supports provide good stability, and colour coding makes set-up quick and convenient. A perfect tent for any number of purposes, including camping, paddling, sailing, or why not even an extra room in the backyard? The outer tent is made of PU-coated polyester and can handle a 3000 mm water column. The inner tent is made of Oxford Polyester and the floor fabric can handle a 7000 mm water column. The tent is equipped with storm guy lines. The tents have privacy windows and a floor that can easily be snapped into place between the sleeping compartments. They also come with poles that allow you to raise the door for rain protection or a shady spot outside the tent.

BIFROST EVENT

Bifrost Event is a tent without an inner tent. It is suitable not only for exhibitions and other events, but also when you need a large space under cover. There is enough room to entertain 10-15 people. It has 12 equipment hangers on the inside of the tent. You put up the tent using four aluminium arch supports. The tent has taped seams, is made of PU-coated polyester and can handle a 3,000 mm water column. The tent has 22 attachments on the outside for storm guy lines. It also comes with poles that allow you to raise the door for rain protection or to provide a shady spot outside the tent. The maximum standing height is 210 cm. Repairing kit is included.

Article number: 424002
Dimensions: 4500 x 2500 x 2100 mm • 177.1" x 98.4" x 82.6"
Weight: 5.9 kg • 13 lbs

BIFROST Y6

The Bifrost Y6 is our roomiest tent with two separate sleeping compartments with room for 3 people in each. The compartments are connected by a “dome” with a diameter of approx. 3 meters. The tent works well for a group of people under one roof that wants a larger space to move around in. The outer tent is made of PU Coated Polyester and the floor fabric can handle a 3000 mm water column. The inner tent is made of Oxford Polyester and can handle a 7000 mm water column. All compartments is equipped with storm guy lines. The tents have privacy windows and a floor that can easily be snapped into place between the sleeping compartments. Bifrost also come with poles that allow you to raise the door for rain protection or a shady spot outside the tent.

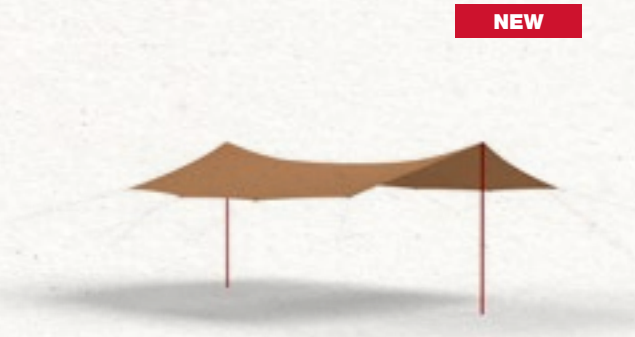

Article number: 423002
Dimensions: 2950 x 3000 x 700 mm • 116.1" x 118" x 27.5"
Weight: 12 kg • 26.5 lbs

SHELTER

This scaled-down tent can be used as protection against rain, wind, and sun. The opening is equipped with a mosquito net that can easily be tucked away at the lower edge. Pouches sewn in around the floor can be filled with sand or stone so that the tent stays put even in the wind. The tent can handle a 3000 mm water column, and the floor fabric can handle a 7000 mm water column. Comes with color-coded arch supports, storm guy lines and stakes.

Article number: 425010
Dimensions: 2500 x 1000 x 1200 mm • 98.4" x 39.3" x 47.2"
Weight: 1.5 kg • 3.3 lbs

TARP

Heavy duty and versatile protection from rain, wind and sun. The OpenFire Tarp is made of a cotton polyester blend with a PFOS and PFOA-free DWR treatment. The OpenFire Tarp L has ten attachment points for guy-lines and OpenFire Tarp S has eight attachment points. The buckle that attach the guy-lines makes it easy to move them around and detach if not needed.

Article number: 741360 – Tarp Small Incl. poles and pegs	741370 – Tarp Large Incl. poles and pegs
741361 – Tarp Small	741371 – Tarp Large
Dimensions: 3500 x 2900 mm • 137.8" x 114.2"	Dimensions: 4500 x 4200 mm • 177.2" x 165.4"

COOLER

The Cooler is an insulated variant of our Utility Sack, perfect for the smaller adventure or to be stowed in your backpack. Fill it with ice or use the Ice Pack to keep your food or beverage cold. The roll-top opening makes it easy to seal the bag tight and also doubles as a handle. The buckle has an integrated bottle opener, which comes in handy when serving drinks. Webbing with loops makes it easy to fasten to your backpack.

Outer fabric in nylon makes the backpack rugged and durable, perfect for the adventuring wear and tear. The inside lining is made of waterproof PU-coated polyester and can be turned inside out for easy cleaning. Additionally, the bag is insulated with EVA foam, which keeps the inside of the backpack cold as well as it gives some rigidity to the bag to make it stand stable on the ground. The Cooler is perfect for serving cold beverages from and great to bring in the backpack, car, boat or kayak.

A 10 L capacity holds enough food for the short adventure while it is still small enough to conveniently be stowed away during transport.

Article number: 740740

Volume: 10 l • 6.8 oz
Dimensions: 300 x 300 x 300 mm • 11.8" x 11.8" x 11.8"
Weight: 475 g • 16.7 oz

COOLER BACKPACK

The cooler backpack is an insulated backpack for all your favorite camping food. Fill it with ice or use the Ice Pack to keep your food or beverage cold. The roll-top opening makes it easy to close and open, a buckle (with a handy integrated bottle-opener) secures the content in the bag.

Outer fabric in nylon makes the backpack rugged and durable. The inside lining is made of waterproof PU-coated polyester, which can be turned inside out for easy cleaning. Insulation in EVA foam keeps the inside of the backpack cold while providing padding for your back and makes it comfortable to wear.

The backpack is equipped with adjustable 30 mm shoulder straps for comfortable carrying. A smaller pocket will fit your kitchen accessories or hold your old bottle caps. The 22 L pack easily holds food for you and your friends. It has space for four 6-packs of longnecks or a couple of BIBs.

The perfect companion for your outdoor adventure.

Article number: 740750

Volume: 22 l • 74.4 oz
Dimensions: 450 x 200 x 300 mm • 17.7" x 7.9" x 11.8"
Weight: 800 g • 28.2 oz

ICE PACK

A smaller roll-top bag made of PU-coated polyester to be filled with ice and used in combination with the Cooler bags. Being waterproof keeps the food from getting wet from melting ice. The Ice Pack is also perfect as a waterproof pack bag, either when returning from the campsite or on its own.

Article number: 740760

Volume: 2 l • 6.8 oz
Dimensions: 200 x 220 x 80 mm • 7.9" x 8.7" x 3.1"
Weight: 35 g • 1.2 oz

CAMPFIRE UTILITY SACK

This versatile bag will make camp life easier. Thanks to a watertight roll top and a coated inside it's completely sealed and easy to clean. Use it to bring food or carry water in. On your way home you can carry trash or used cutlery and plates without ruining your pack. The bag is made from durable nylon and has 8 L capacity.

Article number: 738010

Volume: 8 l / 270.4 oz
Dimensions: Ø 290 x 400 mm • Ø 11" x 16"
Weight: 275 g • 9.7 oz

CAMPFIRE TABLE

The 7075 aluminium frame and the reinforced polycotton fabric top makes this table a sturdy surface to prepare your food on and to eat from. The foldable construction makes it small when stored and quick to set up. The table top can be strapped from the reinforcements and washed in a washing machine.

Article number: 741080

Dimensions: 580 x 580 x 750 mm • 22.8« x 22.8« x 29.5«
Weight: 1700 g • 59.9
Max load: 25 kg • 55.1 lb

CAMPFIRE STOOL

A foldable stool with a frame made of 7075 aluminium and an insulated, warming seat in polycotton fabric – simplicity and comfort combined. The stool takes up little space in the backpack and is quickly unfolded to relieve tired backs and legs. The attached webbing makes it easy to wrap the folded stool, locking it in space with a buckle, which also combines as a bottle opener.

Article number: 741070

Dimensions: 350 x 310 x 350 mm • 13.8" x 12.2" x 13.8"
Weight: 630 g • 22.2 oz.

FOOT REST

Recommended to increase stability for stoves that screw directly onto the gas cartridge, especially when using large pots or cooking on uneven surfaces. The footrest attaches to the base of the cartridge. Also fits other brand cartridges.

Article number: 721171

Dimensions: 27 x 140 x 37 mm • 1.1" x 5.5" x 1.5"

Weight: 22 g • 0.8 oz

STOVE PAW TI

Base plate for Primus stoves. Stove Paw Ti is an essential accessory for hose mounted stoves when used on soft or uneven surfaces like snow, sand or gravel. It increases the footprint of the stove thus making it stand more stable and safe. It is made of titanium making the StovePaw Ti light and durable. The stove's feet clip into special slots in the plate, attaching them securely. The Stove Paw fits Primus' OmniFuel, MultiFuel, OmniLite Ti, EasyFuel, Express Spider and some other stoves with three feet.

Article number: 721230

Dimensions: 120 x 110 x 10 mm • 4.7" x 4.3" x 0.4"

Weight: 55 g • 1.9 oz

WINDSCREEN AND HEAT REFLECTOR SET

For OmniFuel, MultiFuel, Gravity, VariFuel, EasyFuel and Express Spider stoves. Increases heat output and shortens cooking time. The aluminium heat reflector focuses heat on the pot and preheating coil.

Article number: 721720

Dimensions: Wind screen 750 x 150 mm • 29.5" x 5.9", Heat reflector Ø 250 mm

Weight: 87 g • 3.1 oz

SUSPENSION KIT

For those who want to take a break on the mountainside or cook on board a boat. The wires hold the stove and gas cartridge or fuel bottle together, but are separated at the top for easier access to pots and pans. Available in two versions for stoves with three or four legs.

Article number:

721220 – For a stove with three legs

Dimensions: 170 x 170 mm • 6.7" x 6.7"

Weight: 50 g • 1.8 oz

733320 – For a stove with four legs.

Dimensions: 140 x 140 mm • 5.5" x 5.5"

Weight: 65 g • 2.2 oz

MULTI TOOL

For OmniLite Ti, OmniFuel, MultiFuel, MultiFuel EX, Gravity and EtaPower.

Article number:

731860 – For OmniLite Ti, OmniFuel and MultiFuel. With jet cleaner.

Dimensions: 80 x 17 x 15 mm • 3.1" x 0.7" x 0.6"

Weight: 42 g • 1.5 oz.

733930 – For MultiFuel EX.

Dimensions: 88 x 19 x 5 mm • 3.5" x 0.7"

Weight: 16 g • 0.5 oz.

732940 – For Gravity och EtaPower. With jet cleaner.

Dimensions: 88 x 19 x 5 mm • 3.5" x 0.7" x 0.2"

Weight: 17 g • 0.6 oz

- 731660 Non-return valve (mod. 1998)
- 721460 Fuel pump maintenance kit

REGULATOR

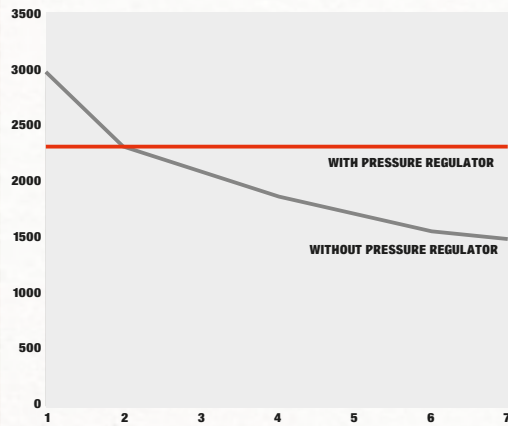

Gas is stored above atmospheric pressure in gas cartridges. A new, full gas cartridge is at the highest pressure and decreases during use. Pressure also varies with temperature and altitude. A pressure-regulated valve adapts to temperature and altitude, which provides consistent power output whereas the non-regulated valve does not adapt and therefore has less consistent output.

Ultimately, stoves with a pressure-regulated valves will work better in cold conditions and perform better when fuel level is low. The regulation system simply self-adjusts the gas flow ensuring performance is at an optimal level.

- A regulated stove...
- ...is more efficient.
- ...works better in cold conditions.
- ...has a more even heat output.
- ...is easier to adjust to the temperature you wish.
- ...enables you to use more gas out of your gas canister.

When you turn the gas knob(1) the spring(2) will be under tension and will open the valve (4) so the gas can flow out of the canister. If the pressure of the gas on the diaphragm (3) is higher than the pre-set allowed pressure, the diaphragm will push onto the spring and regulate the spring in order to regulate the valve opening and therefore the gas flow. This ensures that gas flow is always regulated to an optimal level.

A stove with a regulated valve delivers its optimum BTU’s relatively consistently over time. This means your cooking will be more efficient and you will get out more of your gas canister and can boil more water/cook more with the same amount of gas.

The adapter 741320 is needed to make it work.

PRIMUS GAS

Primus has gas for all seasons and purposes. We offer three different gas mixtures for different conditions: Summer Gas, Power Gas and Winter Gas, in order to optimize energy and effectiveness when and where you need it.

Power Gas is our most versatile blend, delivering excellent power even around zero degrees Celsius. Summer Gas is optimized for maximum fuel efficiency in hot conditions up to temperatures to 40 °C. For cold temperatures, we have created Winter Gas that works effectively down to -22 °C.

CHOOSE CO2 NEUTRAL GAS

Primus gas is a carbon dioxide neutral fuel. To compensate for the carbon dioxide emissions from the gas and the metal cartridge, we support a project that helps households in Uganda, one of the poorest countries in the world, to go greener.

By subsidizing and making fuel-efficient stoves accessible for everyone, inefficient firewood or charcoal stoves are replaced and the emission of greenhouse gas is reduced by 1.5 ton of CO2 per stove per year. The high rate of deforestation is lowered, which can prevent draughts and floods. Families benefit from cleaner indoor air and lower energy costs. Less time for collection firewood is needed, which allows girls to go to school and women to pursue income-generating activities.

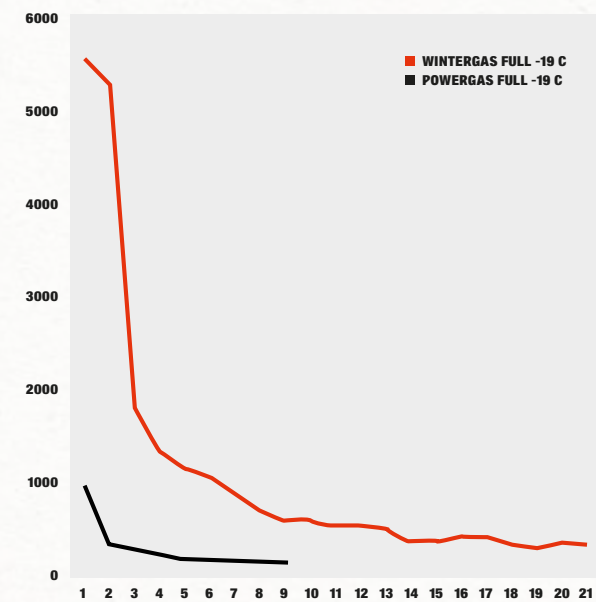

PRIMUS WINTER GAS

HOW DOES IT WORK?

The main innovation behind the cold weather performance of Primus Winter Gas is the Vapor Mesh™, a highly absorbent paper inside the cartridge that keeps the pressure higher making the stove run better. The VaporMesh increases the surface on which the liquid fuel evaporates into gas state. The increased surface makes the change from liquid to gas faster and the speed of this process is what determines the pressure inside the cartridge. Compared to conventional cartridges this makes it work in conditions when it was previously hard to use gas fuels.

IN COMPARISON

When comparing two totally new, full cartridges (one of our old Power Gas and one Winter gas) the difference is not very notable since the pressure is high in both but as the fuel inside the cartridge is consumed the difference becomes more and more evident. With “normal” cartridges in cold conditions pressure inside the cartridge decreases under use, making the stove run with less power or not at all. This is obvious when using a cartridge that is not full. After using a cartridge for 60 minutes of cooking, a Winter Gas cartridge is approximately 9 % more powerful than one without VaporMesh™. After 120 minutes of use it delivers about 15 % more power.

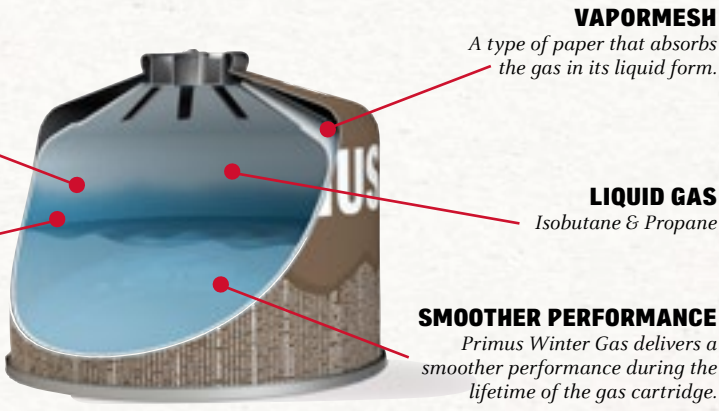

WIDER SURFACE - INCREASED PRESSURE

The phase transition occurs from both the paper and the surface instead of only the surface as in conventional gas cylinders. Thus widens the surface without the need of larger container. This increases the pressure in the gas container.

REDUCED BOILINGTIME

Thanks to the VaporMesh-paper and the gas blend the phase transition from liquid to gas is faster. The burner receives more fuel, which means that the boiling time in low temperatures becomes shorter compared to other gas cartridges.

POWER GAS

Power Gas is our most versatile blend, delivering excellent power from spring to fall. Even if the temperature drops below freezing it stills provides sufficient pressure to run a stove. Its versatility makes it suitable for situations where the weather and temperature conditions are uncertain.

Article number:
220661 – Power Gas 100 g
220662 – Power Gas - 100 g - special languages
220693 – Power Gas 100 g (US)
Dimensions: Ø 90 x 67 mm • 3.5" x 2.6"
Gross weight: 198 g • 7 oz

Dimensions: Ø 108 x 137 mm • 4.2" x 5.4"
Gross weight: 645 g • 22.7 oz

SUMMER GAS

At temperatures of +15°C and above a conventional gas blend will overpower most stoves making them less efficient, resulting in higher fuel consumption than needed. Primus Summer Gas is optimized for summer conditions and temperatures close to +40° C and thus, the gas will stay efficient even in really hot conditions.

Article number:
220751 – Summer Gas 230 g
220752 – Summer Gas 230 g - special languages
Dimensions: Ø 108 x 85 mm • 4.2" x 3.3"

220251 – Summer Gas 450 g
Dimensions: Ø 108 x 137 mm • 4.2" x 5.4"
Gross weight: 645 g • 22.7 oz

WINTER GAS

Gas that works down to -22 °C. Everyone who has used a gas cartridge stove in cold conditions knows this: the lower the temperature, the poorer the performance of the stove. In cold conditions the cartridge pressure decreases under use making the stove run with less power or not at all. Even though the cartridge might have fuel left in it! Why? Liquefied gas doesn't evaporate properly the colder it gets.

Article number:
220771 – Winter Gas 230 g
220772 – Winter Gas 230 g - special languages
220773 – Winter Gas 230 g (US)
Dimensions: Ø 108 x 85 mm • 4.2" x 3.3"
Gross weight: 390 g • 13.7 oz

SUMMER PIERCEABLE GAS - WITHOUT VALVE

The Primus single-use pierceable cartridge contains 190 g butane/propane mix.

Article number: 221051
Dimensions: Ø 90 x 90 mm • 3.5" x 3.5"
Gross weight: 375 g • 13.2 oz

CASSETTE GAS

Contains 220 g (7.7 oz) butane. Cartridges are equipped with self-sealing, safety valves and bayonet joint.

Article number: 220851
Dimensions: Ø 65 x 200 mm • 2.6" x 7.9"
Gross weight: 325 g • 11.4 oz

POWER FUEL

Contains naphtha.

Article number: 220994
Volume: 1 l • 33.8 oz
Dimensions: Ø 83 x 240 mm • 3.3" x 9.4"
Weight: 690 g • 24.3 oz

ALLROUND GAS

Butane gas for refilling gas lighters. The cap includes five different nozzles.

Article number: 720061
Dimensions: Ø 52 x 182 mm • 2" x 7.1"
Volume: 290 ml • 9.8 oz
Gross weight: 214 g • 7.5 oz

LEAK SPRAY

To test the seal on gas and air systems under pressure. For use on tubing, hoses, connectors, joints, and couplings. Easy-to-see, small bubbles reveal the tiniest break in the seal. Can also be used to test refrigeration and compressed air equipment, tires and inner tubes, inflatable boats, and more. Good to have in your toolbox, car, trailer, or boat.

Article number: 888888
Dimensions: Ø 50 x 148 mm • 2" x 5.8"
Weight: 84 g • 6.5 lbs

	Functions • Fonctions • Funktionen • Funktioner

A scenic landscape featuring a calm lake in the middle ground, surrounded by dense evergreen forests. In the foreground, there's a rocky, uneven terrain with some sparse vegetation and fallen branches. The background shows misty, rolling hills under a soft, overcast sky.

TODAY IS A GREAT DAY

*Because every day deserves adventure,
because every day can be a great day,
because when you've fed well today can
be whatever you want it to be.*

#getoutcookout
